

TSHENELE PROJECTS (PTY) LTD

Reg No: 2014/172077/07

Greetings,

Tshenele Projects is an organisation that is 100% black owned and managed, based in the Gauteng with offices in Johannesburg. The organisation's main mission lies within its passion for youth development and empowering the youth from previously disadvantaged communities.

After having seen the gap in the South African Skills environment the organisation embarked on assisting in bridging the gap between the lack of Skills and inability of the majority of the school leavers to be able to fund their studies. As we all know that 'the wealth of a nation is largely determined by the potential of its poorest citizens'. The company identified Durban as the ideal metro that would benefit the youth from previously disadvantaged communities who study in the universities and also seek employment opportunities within the city.

Tshenele Projects assists students with financial challenges in the ICT field of study in partnership with Mictseta, our key objectives and vision of upliftment of previously disadvantaged youth. The relation between the students doesn't only end with funding but will continue as the organisation undertakes to also assist in finding employment for the graduates by means of partnering with major corporate companies.

Kind regards
Z Hadebe
